About the nursery

We run all production ourselves in Lyski, under ongoing PIORiN supervision. This lets us control quality at every stage.

01
Our own production
We grow every plant ourselves, from young plant to mature shrub.

02
Proven quality
CAC-grade plant material, PIORiN oversight and plant passports.

03
Scale and experience
2 million plants in containers, over 3 million young plants in plug trays and work with customers across Europe since 2008.

04
We grow to your needs
We are open to our customers' suggestions. A different species, variety or a larger pot? We will plan production for your order.

From young plant to your customer

01 **Young plant**
Young plants start in M104 plug trays in our polytunnels.

02 **Pot**
We pot them on into P9, C1,5 and C2 pots, then into larger containers, up to big pots.

03 **Field**
They grow in open fields, so they cope well with planting. All production is supervised by PIORiN, the Polish plant health inspection.

04 **Packing**
We pack on CC trolleys, in crates or on pallets, with plant passports.

05 **Transport**
By our own transport or a forwarder, across Poland and to 34 countries.

06 **At your place**
On a plantation, in a garden centre or on a retail chain's shelf.

CAC-grade plant material
for all young plants

PIORiN supervision
licensed nursery

Plant passports
and phytosanitary certificates for export

Species and containers

Containers

M104
plug tray, 104 plants
Age: young plant

For nurseries, for growing on in pots.

P9
approx. 0.5–0.7 l
Age: 2–3 years

A young bush in a small pot, at the lowest price. For plantations and growing on.

C1,5
1.5 l
Age: 2–3 years

Garden centre shelves and plantations.

C2
2 l
Age: 2–3 years

A bush ready for sale and garden planting.

C5
5 l
Age: 3–4 years

A larger bush for display and an earlier first harvest.

C15
15 l
Age: ask us

A large bush for premium display.

Blueberry varieties – harvest calendar

By combining early, mid-season and late varieties you can harvest from July to September. Dates are approximate.

Dates are approximate for central Poland (Institute of Horticulture, Dąbrowice 2021–2023) and vary with the year and region. The list shows the varieties we have now. Other varieties can be grown to order – just ask.
